## Dual Beam Opening Barrier System

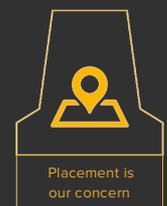

The **LockBlock Deuce** is a very high quality opening blockade. The barrier enables a sustainable and accessible road block on sites where safety is a high priority issue. The blockade is able to close down access roads hermetically while quick access in case of emergencies is guaranteed. The barrier system consists of two reinforced concrete blocks and matching extendable high performance steel beams. The running gear of each block ensures smooth and silent operation of the movable beams. To securely lock down the barriers' gateway, the system is equipped with a hardened steel lock with a metal key. The robust barrier stands out by simplicity and easy operation. The heavy set-up is immovable, uncrackable and easy-care. The blockades can be ordered in different standard sizes for roads widths from 6 up to 12 m but tailor-made solutions are possible to meet specific customer needs. The barriers are expandable with several accessories and camouflage options.

### Advantages

- Life-saving and secure
- Immovable and stable
- Sustainable
- Mechanical operation (not hackable)
- Unmanned closure (low staff costs)
- Quick access by emergency services
- Silent and smooth running gears
- Basic design
- Maintenance free
- Large gateway openings up to 12 m
- Fully certified according to PAS68 / IWA14-1
- Attractively priced

### Applications

- Public environments
- Industrial sites and plants
- Music festivals
- Fairs
- Sports events
- Ports and harbour sites
- Cargo storage and transshipment sites
- Cruise terminals
- Airports
- Military areas
- Medical centers
- Border crossings

## Technical Accessories

- Camera systems
- Electrical drive train with remote control
- Connectors
- Advertising bill boards
- Signage elements
- Lighting

## Street Furniture and Eco Design

- Benches
- Planters
- Bicycle racks
- Chains
- Special paint designs
- Camouflage boxes

## Additional Documentation

- Operation manual
- Safety test report and certificate
- Product catalogue with accessories and extension possibilities
